4. Examiner's Comment Regarding Requirement for Deposit	8. X Examiner's Stateme	nt of Reasons for Allo	wance
of Biological Material .	9.	AN Q. NGUYEN MARY EXAMINER	

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This communication is an Examiner's reasons for allowance in response to application filed on 2/7/02, assigned serial 10/067288 and title "Brake Device For Vehicle".

2. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

After carefully reviewing the application in light of the amended claims and the additional search of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.

Although the references found disclose several claimed limitations, none of the references discloses a brake device comprising: a sensor device to detect operating values of an actuator and to provide operating values to drive controller, sensor device being disposed at the unspring-mass wheel side of a vehicle, wherein drive controller is located at the unspring-mass wheel side of a vehicle and makes communication with vehicle motion controller provided on a spring-mass vehicle body side of vehicle by bi-directional multiplex communication (claims 10-11), wherein communication between drive controller and vehicle motion controller is made by radio communication (claim 5); also, wherein in a portion connecting the spring-mass vehicle body side and the unspring-mass wheel side, a signal line connecting drive controller and vehicle motion controller and a power line for supplying an electric power to drive controller are constructed by one cable covered with a same sheath (claim 2). None of the references found, means for reducing the number of bending cables required to provide electrical communication between the actuator, the sensors, the drive controller and the vehicle motion controller, means

Application/Control Number: 10/067,288

Art Unit: 3661

comprising locating sensor device and drive controller on unspring-mass wheel side of the vehicle (claim12).

Claims 2-8, and 10-12, are allowable over the prior art of record.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dalena Tran whose telephone number is 703-308-8223. The examiner can normally be reached on M-F (7:30 AM-5:30 PM), off every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black can be reached on 703-305-8233. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
